

PET SERIES

Sustainability, convenience and performance—all rolled into one package you can trust. PET coating material is both for freezer and oven use, which is the perfect choice for bakery, ready meal, and take-away food etc. Besides, this kind of material can be applied to various kinds of products with low investment of tooling, such as soup container, salad bowl, single wall cup, rectangular container and so on. In this way, it is an extension of the current product line and fulfills the specific requirement of the customers.

Moreover, we do have different colors PET coating for different food application, not to mention that the kraft material with PET coating is issued exclusively by us which can't be found in the current market.

COMPARED WITH PLASTIC PET CONTAINER, IT IS WITH GREAT ADVANTAGE

Advertisement

Branding your special food with fantastic design. Telling brand story and culture.

Sustainability

90% Less Plastic, 100% Longer Future.

Cook

Dual ovenable board material is suitable for both microwave and convection ovens, enabling meals to be heated quickly, evenly and thoroughly for fast food convenience

Freeze

Unlike rigid plastic, board trays do not become brittle and shatter in the freezer.
